

ORGO-THERMIT FULL HEAD REPAIR WELD

For the repair of railhead defects

The rail neutral stress temperature of the rail is not affected
 The web and base of the rail remain intact through the entire process
 Fast and reliable process takes approximately 30 minutes versus 2 hours
 required to perform two Thermit® welds

FEATURES & BENEFITS

- Portable and cost-effective means to repair railhead defects
- The rail fasteners remain in track
- A single weld replaces the full width of the rail head section
- Lateral rail alignment is maintained

ISO 9001:2008 and AARM-1003 Certified
