

ORGO-THERMIT RAIL SERVICE

A 12 STONE COMBINED STREET AND RAIL SERVICE VEHICLE

We would like to introduce our brand new Grinding Division.
Our vehicle is designed for precision grinding and corrugation removal.

To date we have completed numerous jobs throughout North America including,
New York City, Baltimore, Atlantic City, Minneapolis, Houston, Salt Lake City, San Diego, Los Angeles,
Calgary and Edmonton.

FEATURES & BENEFITS

Our vehicle is equipped with an on-board water supply and dust suppression system.

Both rails can be ground simultaneously.

Under normal conditions, the vehicle can grind up to 750' per hour.

When high rail equipment is engaged, the vehicle is 10'4" above the rail and extends 16" over each side of the rail from the gauge.

Engage high rail equipment on track in 30 seconds which means more time spent grinding rails

A precision grinding experience for you and your customers.
